**B. Pass Through Charges**

NSX may pass through to a specific ETP Holder costs that are assessed to the Exchange by a third party that are attributable to that particular ETP Holder for its use of the facilities of the Exchange.

Explanatory endnotes:

- (1) As specified in Rule 11.13(b)(1).
- (2) “**Displayed Orders**” means orders that are not Zero Display Orders.
- (3) “**Liquidity Adding ADV**” means, with respect to an ETP Holder<sup>10</sup>, the number of shares such ETP Holder has executed as a liquidity provider on average per trading day (excluding partial trading days) across all tapes on NSX for the calendar month (or partial month, as applicable<sup>11</sup>) in which the executions occurred; provided, however, that for purposes of calculating an ETP Holder’s Liquidity Adding ADV solely with respect to the rebate in AutoEx for Displayed Orders that add liquidity, the full trading day during the measurement period on which such ETP Holder’s liquidity adding volume is lowest shall be excluded; provided, further, that for purposes of calculating an ETP Holder’s Liquidity Adding ADV with respect to the rebates in Order Delivery, securities priced under one dollar shall be excluded.
- (4) “**Zero Display Orders**” means “Zero Display Reserve Orders” as specified in Rule 11.11(c)(2)(A).
- (5) “**Total ADV**” means, with respect to an ETP Holder<sup>10</sup>, the number of shares such ETP Holder has executed as a liquidity provider, liquidity taker and router of executed trades on average per trading day (excluding partial trading days) across all tapes on NSX for the calendar month (or partial month, as applicable<sup>11</sup>) in which the executions occurred. For purposes of clarity: (i) no rebates apply to Zero Display Orders where the ETP Holder fails to achieve a Liquidity Adding ADV of at least 5 million shares in the same month (or partial month, as applicable); (ii) no rebates apply to Zero Display Orders where the ETP Holder fails to achieve Total ADV of at least 30 million shares in the same month (or partial month, as applicable); (iii) both Displayed Orders and Zero Display Orders in AutoEx and Order Delivery are counted for purposes of determining Total ADV; and (iv) the foregoing rebates apply only to liquidity adding Zero Display Orders executed in AutoEx.
- (6) “**Trade value**” means a dollar amount equal to the price per share multiplied by the number of shares executed.
- (7) As specified in Rule 11.13(b)(2).
- (8) As specified in Rule 16.4.
- (9) Orders that are routed via NSX and executed in another market center.
- (10) Upon verification and approval by NSX, the number of shares executed by ETP Holders under common ownership and control will be aggregated for purposes of calculating average daily volumes. See Rule 16.3.
- (11) In the event of any change to this Fee and Rebate Schedule at other than the end of a calendar month, volume calculations will be made on the basis of such number of full trading days within such month during which the unchanged pricing or rebate program’s terms are in effect.
- (12) “**Quote spread**” means a dollar amount equal to the number of shares executed multiplied by the difference at the time of execution between (x) the price per share of the national best bid, and (y) the price per share of the national best offer, in each case as such quotes are disseminated pursuant to an effective national market system plan and as the terms “national best bid” and “national best offer” are more fully defined in Rule 600 of Regulation NMS; provided, for purposes of clarity, that no rebate based on the quote spread shall be payable in the event of crossed or locked quotations.
