Strategies Defined:

• A dividend strategy is defined as transactions done to achieve a dividend arbitrage involving the purchase, sale and exercise of in-the-money options of the same class, executed the first business day prior to the date on which the underlying stock goes ex-dividend.

• A merger strategy is defined as transactions done to achieve a merger arbitrage involving the purchase, sale and exercise of options of the same class and expiration date, executed the first business day prior to the date on which shareholders of record are required to elect their respective form of consideration, i.e., cash or stock.

• A short stock interest strategy is defined as transactions done to achieve a short stock interest arbitrage involving the purchase, sale and exercise of in-the-money options of the same class.

• Reversal and conversion strategies are transactions that employ calls and puts of the same strike price and the underlying stock. Reversals are established by combining a short stock position with a short put and a long call position that shares the same strike and expiration. Conversions employ long positions in the underlying stock that accompany long puts and short calls sharing the same strike and expiration.

• A jelly roll strategy is defined as transactions created by entering into two separate positions simultaneously. One position involves buying a put and selling a call with the same strike price and expiration. The second position involves selling a put and buying a call, with the same strike price, but with a different expiration from the first position.
• A **box spread strategy** is a strategy that synthesizes long and short stock positions to create a profit. Specifically, a long call and short put at one strike is combined with a short call and long put at a different strike to create synthetic long and synthetic short stock positions, respectively.

**Strategy Caps:**

To qualify for a strategy cap, the buy and sell side of a transaction must originate either from the Exchange Trading Floor or as a Floor Qualified Contingent Cross Order.

transacted on an agency basis, the daily cap will apply per beneficial account.

Per member organization dividend, merger, short stock interest, reversal and conversion, jelly roll and box spread strategies ("Monthly Strategy Cap")

combined executions in $65,000 a month when trading in its own proprietary accounts

• Reversal and conversion, jelly roll and box spread strategy executions will not be included in the Monthly Strategy Cap for a Firm. Reversal and conversion, jelly roll and box spread strategy executions (as defined in this Options 7, Section 4) are included in the Monthly Firm Fee Cap. All dividend, merger, short stock interest, reversal and conversion, jelly roll and box spread strategy executions (as defined in this Options 7, Section 4) will be excluded from the Monthly Market Maker Cap. NDX, NDXP, and XND Options Transactions will be excluded from Strategy Cap pricing.
