

## **Anoop Prasad, Ph.D.**

Anoop Prasad is a managing director in the D. E. Shaw group's quantitative equity research team and serves as the primary liaison between this centralized research group and the institutional asset management business. Dr. Prasad is also currently a rotating member of the firm's operating committee. In 1997, he joined the D. E. Shaw group, where he has focused on the development and implementation of certain of the firm's quantitative equity trading strategies. Dr. Prasad earned his B.Sc. in physics from the University of Bombay in 1991, and received master's and doctoral degrees in theoretical physics at the California Institute of Technology in 1993 and 1997, respectively. His graduate work focused on exotic states of matter such as superfluidity and superconductivity and involved the extensive application of various computational methods.
